

SANDIP DAS

✉ sandip.das39@gmail.com ☎ +91-7595841999 📍 Noida, India

Professional Summary

Senior DevOps Engineer with 16+ years of IT experience and deep expertise in cloud and DevOps engineering. Expert in designing and operating scalable AWS platforms using Infrastructure as Code (Terraform, CloudFormation), CI/CD pipelines, and Kubernetes-based container orchestration. Strong background in Linux, cloud migration, and automation, with a proven track record of accelerating deployments, enhancing system resilience, and driving operational excellence.

Professional Experience

Senior DevOps Engineer, S&P Global

04/2022 – Present
Noida, India

- Architected and implemented AWS cloud infrastructure using Terraform and CloudFormation, establishing modular Infrastructure-as-Code frameworks for scalable, repeatable, and governed deployments.
- Directed cloud re-architecture for domain migration, redesigning DNS and load balancing strategies for seamless cutover.
- Engineered multi-region AWS disaster recovery solutions across ECS, RDS Aurora, ElastiCache, S3, CloudFront, and Route 53, improving application resilience and recovery readiness.
- Implemented GitOps-based Kubernetes deployments using Argo CD and Amazon EKS, automating application delivery and improving deployment consistency across environments.
- Modernized enterprise CI/CD platforms across GitHub Actions, GitLab, TeamCity, Azure DevOps and Octopus Deploy, improving deployment automation, pipeline reliability, and release consistency.
- Drove AWS cloud cost optimization and governance initiatives through resource-rightsizing, monitoring, tagging, and infrastructure optimization, reducing unnecessary cloud expenditure.
- Implemented centralized Splunk observability using AWS Lambda for automated cloud log forwarding and monitoring.
- Provided technical mentorship across DevOps, AWS, IaC, and CI/CD, guiding engineers on best practices and driving consistent adoption of engineering standards.

Senior System Administrator, S&P Global (formerly IHS Markit)

01/2017 – 03/2022
Gurgaon, India

- Managed 200+ Linux and Windows servers, ensuring 99.9% uptime, performance optimization, and high availability across enterprise environments.
- Migrated enterprise backup infrastructure from on-premises to AWS, improving scalability, reliability, and operational efficiency.
- Oversaw infrastructure security and compliance, improving patching posture, reducing critical vulnerabilities, and enabling zero-downtime database upgrades.
- Designed and managed scalable CI/CD agents across TeamCity, GitLab, Azure DevOps, and Octopus Deploy to streamline and automate releases.
- Automated server provisioning and operational tasks using Python, AWS Lambda, and Bash, driving ownership of infrastructure.
- Integrated SonarQube and WhiteSource into CI/CD pipelines, implementing automated code quality and security checks to strengthen DevSecOps practices.

Technical Specialist, HCL Technologies – Infrastructure Services - Administered enterprise backup platforms including NetBackup (v7.6+) and OpsCenter, managing large-scale backup operations, policy configuration, and monitoring. - Managed 18,000+ CommVault clients, performed IBM tape drive and Quantum library firmware upgrades, and configured Vault, SLPs, and ProtecTIER VTL with regular DR validation.	10/2014 – 12/2016 Noida, India
Implementation Engineer, ITAccess Pte Ltd. - Led CommVault backup implementations and upgrades (v9 v10) with DR setups and storage policies for key clients. - Implemented backups for SAP, Oracle, SharePoint, AD, Exchange, VMware, and Hyper-V; managed UAT, documentation, and EMC VNX storage on UNIX/Windows.	08/2013 – 07/2014 Singapore, Singapore
Netbackup Administrator, Softenger Singapore Pte Ltd. Maintained and optimized 26 NetBackup master servers across US, Europe, and APAC, performing DR client migrations, backup tuning, and Bash/Perl-based operational automation.	08/2012 – 06/2013 Singapore, Singapore
Technical Services Specialist, IBM India private Ltd. Streamlined NetBackup operations across multiple data centers, supporting Oracle/SQL backups, Solaris clients, automated reporting, and resolution of tape library and backup issues.	02/2012 – 07/2012 Bangalore, India
Senior Analyst, HCL Technologies Ltd. Executed end-to-end management of NetBackup and CA Arcserve infrastructure across Unix and Windows environments, implementing RMAN, NDMP, and snapshot backup solutions while automating reporting and executing disaster recovery procedures.	07/2009 – 02/2012 Noida, India

Education

B.Tech, Electronics & Communication Engineering, Sikkim Manipal Institute of Technology GPA: 8.06	07/2004 – 06/2008
--	-------------------

Skills

Cloud & Infrastructure Automation(IaC)

AWS, Terraform, CloudFormation, Ansible

Containerization & Orchestration

Docker, Kubernetes, EKS, ECS/Fargate

Operating Systems & Monitoring

Linux, Windows, Splunk Observability, Grafana

CI/CD & DevOps

GitHub Actions, GitLab CI, ArgoCD, TeamCity, Octopus Deploy, TFS, Azure Devops, Helm

Languages & Scripting

Python, Bash, PowerShell

Certifications

**AWS Certified DevOps Engineer
– Professional**

2021

**AWS Certified Solutions
Architect – Associate**

2020

**AWS Certified SysOps
Administrator – Associate**

2021

**Certified Kubernetes
Administrator**

2021

Red Hat Certified Engineer

2016

**Red Hat Certified System
Administrator**

2016

**CommVault Certified
Professional**

2018

**Veritas NetBackup Data
Protection Administration**

2010
